***Drawings***

1. This application was filed with informal drawings. The application having been allowed, formal drawings are required in response to this Office Action.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The status identifiers for the claims listed below have been changed to comply with 37 CFR 1.121:

The status identifier for claim 1 has been changed to “(previously presented)”.

The status identifier for claim 6 has been changed to “(previously presented)”.

The status identifier for claim 8 has been changed to “(cancelled)”.

The status identifier for claim 9 has been changed to “(previously presented)”.

The status identifier for claim 10 has been changed to “(cancelled)”.

The status identifier for claim 11 has been changed to “(cancelled)”.

The status identifier for claim 12 has been changed to “(cancelled)”.

The status identifier for claim 21 has been changed to “(previously presented)”.

The status identifier for claim 22 has been changed to “(previously presented)”.

Art Unit: 3611

The status identifier for claim 23 has been changed to “(previously presented)”.

The status identifier for claim 24 has been changed to “(cancelled)”.

3. The following is an examiner’s statement of reasons for allowance: The main reason for the allowance of claim 1 is that the prior art fails to disclose a bicycle including a power assist drive section comprising a power assist drive member concentrically mounted around a crank shaft and said power-assist drive member having a fixed drive connection to a sprocket section and a power-assist-overrunning drive connection between the power-assist drive member and a gear section drive output. The main reason for the allowance of claim 21 is that the prior art fails to disclose a bicycle including a power assist drive section comprising a power assist drive member concentrically mounted around a crank shaft and said sprocket section and said first pedal member being nearer to a second side of the frame, and said power-assist drive member having a second end portion that connects to a sprocket drive, and a first end portion that is nearer to a first side of the frame, said first end portion connecting through the power-assist overrunning drive connection to the gear section drive output. The main reason for the allowance of claim 22 is that the prior art fails to disclose a bicycle including a power assist drive section comprising a power assist drive member concentrically mounted around a crank shaft and said power-assist drive member having a tubular configuration with first and second power-assist member portions on opposite sides of the bicycle, said power-assist drive member and said crank housing being positioned concentrically around a center axis of said crank shaft. The main reason for the allowance of claim 23 is that the prior art fails to disclose a bicycle a motor section comprising said motor being a high-speed motor that is driven by petroleum-based fuel and

Art Unit: 3611

operates at least 1000 RPM, said motor having a sheave-and-belt drive connection with said speed-reducing gear section, whereby tension forces exerted on the sheave-and-belt drive from the motor to the speed-reducing gear section are substantially less than forces imposed in the drive connection between the speed-reducing gear section and the power-assist drive member.

The main reason for the allowance of claim 25 is that the prior art fails to disclose a bicycle including a power assist drive section comprising a power assist drive member concentrically mounted around a crank shaft and a high-speed motor that is driven by petroleum-based fuel and operates at least 1000 RPM, said motor having a sheave-and-belt drive connection with said speed-reducing gear section, whereby tension forces exerted on the sheave-and-belt drive from the motor to the speed-reducing gear section are substantially less than forces imposed in the drive connection between the speed-reducing gear section and the power-assist drive member.

The main reason for the allowance of claim 26 is that the prior art fails to disclose a bicycle including a power assist drive section comprising a power assist drive member concentrically mounted around a crank shaft and said power-assist drive member having a fixed drive connection to the sprocket section and the power-assist-overrunning drive connection is between the power-assist drive member and the gear section drive output.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
